Topics Discussed:

On this second meeting our team expanded the idea of the Traveling Management Platform by thinking of more features out of the researches each member of the group did. We enriched our project idea by adding more functionalities to the travel agencies users such as the rights to be advertised and to appear the first in any search a client would make as well as creating occasions for their traveling posts based on some rules the agency itself would specify. We also discussed the possibility of having a chat system between the traveling agencies and their clients.

After we gave our project a little bit more shape, we thought about how the database's entities would cooperate with each other in the backend. Everyone gave some ideas and little by little the whole "puzzle" was created.

Then we assigned some tasks to the group members for this week continuity.

At the end we have to put a name to our group project and software solution we are about to develop, so we came up with the name "WhereTo" since it is easy to remember and catchy.

Decisions Made:

- Travel Agencies would have the possibility to:
 - advertise them selves
 - create occasions about posts regarding some constraints
 - see user's reviews
- Clients would have the possibility to:
 - See the history of their travels
 - To review the service, they got from the agency in pop up form or from history
 - Pay for the booked place online

Tasks Assigned:

- Sketches and start of prototyping
- Starting the creation of activity diagrams
- Creating database and its diagrams
- Setting up the hosting platforms
- Getting familiar with “Figma” software for prototyping
